

Music Therapy Source

GUITAR CLUB

Content Checklist

You may earn a certificate for completing the course materials in the Music Therapy Source Guitar Club. As of right now, I am NOT an approved CMTE provider. However, you can submit hours earned in self-study. This process is outlined in the CBMT Recertification Manual (see page 15).

If you would like to take advantage of this option, I hope I can make it as easy for you as possible. Therefore, I've created this checklist that you can keep with your records. If you email me a copy of this completed checklist, I will provide a certificate that you can keep with your records. Please note that keeping records is your responsibility should there be an audit. CBMT also requires a written summary of what you have learned in this non-approved self-study.

We often work better when we set goals. Therefore, a column has been provided in which you can indicate your target completion date. This is completely optional. For credit toward your MTS Guitar Club certificate, all that is needed is the completion dates.

Course: Harmonic Alchemy

Subject: Basics of harmony, transposition, harmonic enhancements, using color chords in relaxation interventions
